

Sumit Raj

Data Analyst

CONTACT

Location: Patna, India **Phone:** +91 9472441137 **Email:** info.sr0909@gmail.com
LinkedIn: linkedin.com/in/er-sumit-raj- **GitHub:** github.com/sumit966
Portfolio: sumit966-github-io.vercel.app

SKILLS

Analysis: SQL (Joins, Aggregations), Python, Pandas, NumPy, Exploratory Data Analysis, Data Cleaning, Statistics, Probability, KPI Definition
Visualization and BI: Power BI, Matplotlib, Seaborn, Dashboards, Data Visualization
Databases: MySQL, PostgreSQL, SQLite
Languages and Tools: Python, SQL, R, Scikit-learn, Git, GitHub
Building: DAX, cohort analysis, RFM segmentation, window functions

EDUCATION

Visvesvaraya National Institute of Technology (VNIT), Nagpur <i>M.Tech, Applied AI and Machine Learning</i>	2024 – May 2026 CGPA: 6.53/10
Dr. D.Y. Patil Institute of Technology, Pune <i>B.E., Computer Science</i>	2019 – 2023 CGPA: 7.89/10

CERTIFICATIONS

- Microsoft Power BI Data Analyst Associate (PL-300)
- Google Cloud: Cloud Fundamentals

EXPERIENCE

Software Engineer Intern, Salesforce (Remote) - Analyzed 10,000+ CRM records with SQL to identify business trends and optimization opportunities. - Built Power BI dashboards for stakeholders, reducing manual report generation by 60%. - Cleaned and transformed large datasets with Python Pandas and defined KPIs with business teams.	Feb 2022 – May 2022
---	---------------------

PROJECTS

E-commerce Sales and Customer Analytics Dashboard <i>SQL, PostgreSQL, Python, Pandas, Power BI</i> - Cleaned and modeled a public retail transactions dataset with SQL and Pandas into one analysis-ready table. - Segmented customers with RFM analysis and tracked cohort retention and monthly revenue trends. - Built an interactive Power BI dashboard with KPIs (revenue, average order value, repeat purchase rate) and written business insights.	2026
Customer Churn Analysis and Prediction <i>Python, SQL, Pandas, Scikit-learn, Matplotlib, Power BI</i> - Analyzed a public telecom churn dataset with SQL and Python to find the factors linked to customer churn. - Trained a logistic regression model and ranked churn drivers with feature importance. - Presented findings and retention recommendations in a Power BI dashboard.	2026
RAG-Based Clinical Question Answering System <i>Python, LangChain, ChromaDB, FastAPI, Docker, GitHub Actions</i> - Built a RAG pipeline for clinical document retrieval with LangChain and ChromaDB, reaching 92% answer relevance on a 100-question benchmark. - Added hybrid search (BM25 + dense embeddings) with Reciprocal Rank Fusion, improving retrieval accuracy by 18%; deployed with FastAPI, Docker and GitHub Actions CI/CD at under 500 ms latency.	2025
LLM-Powered Security Log Analyzer <i>Python, LangGraph, OpenAI API</i> - Built a LangGraph agent workflow with the OpenAI API to analyze 50K+ security logs and generate natural-language threat summaries. - Added a self-reflection evaluation loop that kept hallucination under 3% on 200 curated test cases.	2025
Military Vehicle Detection and Face Authentication Security System <i>Python, YOLOv8, OpenCV, Haar Cascade</i> - Built a real-time surveillance system with Haar Cascade face authentication at approximately 95% detection accuracy. - Detected and tracked military vehicles with YOLOv8 and OpenCV, sending automated email alerts for security events.	Academic Project
Brain Tumor Detection from MRI Scans <i>Python, Deep Learning</i> Trained a deep learning model to classify brain tumors on 3,000+ MRI scans.	2024
Mobile Botnet Detection System <i>Python, Scikit-learn</i> Built a machine learning model to detect malicious bot communications with C&C servers by analyzing Android network traffic patterns.	2023
