

Sumit Raj

Full Stack Developer

CONTACT

Location: Patna, India **Phone:** +91 9472441137 **Email:** info.sr0909@gmail.com
LinkedIn: linkedin.com/in/er-sumit-raj- **GitHub:** github.com/sumit966
Portfolio: sumit966-github-io.vercel.app

SKILLS

Frontend: React.js, JavaScript, TypeScript
Backend: Node.js, FastAPI, REST APIs, Microservices (basic)
Languages: JavaScript, TypeScript, Python, Java, SQL
Databases: MySQL, PostgreSQL, MongoDB
Tools and DevOps: Git, GitHub, Docker, GitHub Actions CI/CD, GCP, Linux
Building: JWT authentication, WebSockets, role-based access

EDUCATION

Visvesvaraya National Institute of Technology (VNIT), Nagpur <i>M.Tech, Applied AI and Machine Learning</i>	2024 – May 2026 CGPA: 6.53/10
Dr. D.Y. Patil Institute of Technology, Pune <i>B.E., Computer Science</i>	2019 – 2023 CGPA: 7.89/10

CERTIFICATIONS

- Docker Mastery, Udemy (in progress)
- Google Cloud: Cloud Fundamentals
- Google Cloud: Cloud Security

EXPERIENCE

Software Engineer Intern, Salesforce (Remote)	Feb 2022 – May 2022
• Integrated Salesforce APIs into optimized backend workflows, improving system efficiency by approximately 25%. • Built Python bulk data-processing pipelines, cutting manual data handling by approximately 40%. • Wrote SQL queries with joins and aggregations to support CRM data analysis for business teams.	

PROJECTS

AI Document Chat Web App <i>React.js, Node.js, FastAPI, PostgreSQL, JWT, Docker</i>	2026
• Built a full-stack app with JWT login where users upload PDFs and chat with their documents through a RAG backend. • Developed a React frontend with chat history and REST APIs backed by PostgreSQL. • Containerized with Docker and deployed to GCP Cloud Run through GitHub Actions CI/CD.	
Real-Time Collaborative Task Board <i>React.js, Node.js, MongoDB, WebSockets, Docker</i>	2026
• Built a Kanban-style task board where team members create, assign and move tasks with live updates over WebSockets. • Developed Node.js REST APIs with MongoDB storage, JWT authentication and role-based access. • Set up GitHub Actions CI and Docker deployment.	
RAG-Based Clinical Question Answering System <i>Python, LangChain, ChromaDB, FastAPI, Docker, GitHub Actions</i>	2025
• Built a RAG pipeline for clinical document retrieval with LangChain and ChromaDB, reaching 92% answer relevance on a 100-question benchmark. • Added hybrid search (BM25 + dense embeddings) with Reciprocal Rank Fusion, improving retrieval accuracy by 18%; deployed with FastAPI, Docker and GitHub Actions CI/CD at under 500 ms latency.	
LLM-Powered Security Log Analyzer <i>Python, LangGraph, OpenAI API</i>	2025
• Built a LangGraph agent workflow with the OpenAI API to analyze 50K+ security logs and generate natural-language threat summaries. • Added a self-reflection evaluation loop that kept hallucination under 3% on 200 curated test cases.	
Military Vehicle Detection and Face Authentication Security System <i>Python, YOLOv8, OpenCV, Haar Cascade</i>	Academic Project
• Built a real-time surveillance system with Haar Cascade face authentication at approximately 95% detection accuracy. • Detected and tracked military vehicles with YOLOv8 and OpenCV, sending automated email alerts for security events.	
Brain Tumor Detection from MRI Scans <i>Python, Deep Learning</i>	2024
• Trained a deep learning model to classify brain tumors on 3,000+ MRI scans.	
Mobile Botnet Detection System <i>Python, Scikit-learn</i>	2023
• Built a machine learning model to detect malicious bot communications with C&C servers by analyzing Android network traffic patterns.
